- Imported

Information

The amazing artistry of this piece is recognized as each piece is individually hand-crafted to look like a solid piece of teak wood. Each piece of wood is carefully selected and assembled, to create this perfectly sized cube to be used as a stool, a side table or a stand for a prized possession. Truly, a one-of-a-kind, statement-making work of art.

A by-product of sustainable teak wood harvesting in South East Asia, The teak root is painstakingly unearthed, instead of being left to rot underground. This collection of Teak Pedestals are available in 4 sizes.
