- Imported

Description

Constructed from teak, and traditionally found in farmhouses across Southeast Asia. These ladders now serve as functional decorative / display pieces for the modern day home. This unique design is flared at the bottom.

Teak Wood is the most durable and weather-proof of all hardwoods. Teak is known to be the strongest wood in the world and is native to South East Asia. The natural oils the wood produces allows it to be used outdoors year-round, where it develops a beautiful silver-grey patina.

Available in a straight design as well.
